

Carrots are considered to be an ideal health food. That's why back in 1991, AIM introduced a whole-food concentrate containing just carrots to its nutritional lineup. No juicing of this root vegetable required!

In spite of being naturally sweet, carrots have a relatively low impact on blood sugar levels. One serving of Just Carrots contains 7 grams of natural sugar from this healthy vegetable. No other sugar, sweeteners or artificial coloring is added.

Beneficial for **overall whole-body health**, Just Carrots delivers particularly effective nutrition for the **eyes and skin**.

The beta-carotene in carrots is an antioxidant carotenoid that your body converts to vitamin A, essential for red blood cell production, immune-system support, good vision and healthy skin.

Creating Just Carrots

A three-step process is used to make pure, extracted juice from carrots with the fiber removed. Preserving the carrot's nutritional bounty, AIM's process involves freeze-drying at low temperatures in a vacuum-sealed chamber to create carrot crystals that are clearly, healthy gems!

Twenty-two pounds of raw carrots go into each canister of Just Carrots powder, delivering their wealth of vegetable nutrients, including a rich source of beta-carotene and active enzymes.

Carrots for Eyes

Beta-carotene, found in carrots, is a non-toxic precursor to Vitamin A. Vitamin A helps protect the cornea and has been linked to preventing, impairing or reducing several eye-related health concerns: dry eye, superior limbic keratoconjunctivitis, macular degeneration, retinitis pigmentosa and Stargardt's disease, cataracts and recovery after laser eye surgery. Furthermore, vitamin A helps you see better in low light and improves peripheral vision.

Carrots for the Skin

Vitamin A is currently under investigation for its ability to reduce wrinkles caused by the aging process. Vitamin A has also been used to treat acne, repair sun and other damage, maintain healthy skin and relieve psoriasis a bit.

Carrots for the Immune System

Vitamin A deficiency has been linked to an impaired immune system and can increase your risk of catching an infectious disease.

Carrots to Help with Fertility

Vitamin A is vital for the continuation of the species as it helps the male and female reproductive systems as well as embryonic development, especially the development of a healthy nervous system.

Carrots for Oral Health

Vitamin A has bone-boosting properties which can strengthen teeth and is good for the gums, too.

Carrots to Help Fight Cancer and Disease

Vitamin A has been linked to lower rates of breast cancer and has been found to be helpful reducing complications in the following illnesses: malaria, HIV and measles

Vitamin

- Improves eye and skin health
- Boosts immune health with beta-carotene

- Supplements a nutrient deficient diet
